## ABOUT LYNX NATURE BOOKS

Lynx Nature Books, formerly Lynx Edicions, co-founded by renowned ornithologist Josep del Hoyo, offers knowledge and resources to the scientific world and to anyone sensitive to the study, love, and protection of nature.

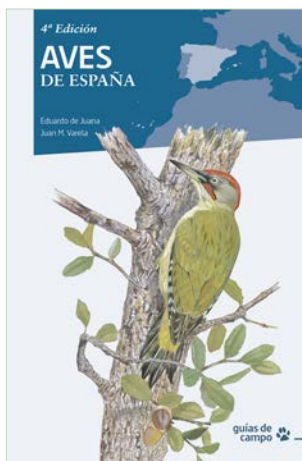

Lynx presents various landmarks **published in English**, including the unique and global **first encyclopaedia** depicting **ALL** the birds on the planet (over 10,000 species): the *Handbook of the Birds of the World*. This monumental project spans 17 volumes, encompassing 13,000 pages, featuring more than 20,000 illustrations, over 7,000 photographs, and referencing over 100,000 bibliographical sources.

Over the 21 years dedicated to crafting the Handbook of the Birds of the World, and with **20,000 copies** sold, Lynx has achieved significant recognition, including the Outstanding Academic Title by Choice: Current Reviews for Academic Libraries (various years), the Best Bird Book of the Year by Birdwatch (various years), the British Birds/ British Trust for Ornithology, and the Best Bird Reference Book by WorldTwitch (various years). Co-founder del Hoyo has also received many international recognitions such as his surname being chosen to describe two new taxa, the Prize for the Divulcation of the Natural World 2011 by the Association for the Divulcation and Conservation of Nature OMACHA, and the Bernis Lifetime Achievement Award 2012 by SEO/BirdLife, among others.

The *Handbook of the Mammals of the World* is another cornerstone of our catalogue, offering comprehensive coverage in 9 volumes, maintaining the same high standards of rigor and excellence in presenting mammalian diversity.

To complement taxonomic works, Lynx updated the taxonomy and distribution of bird and mammal species into the *HBW and BirdLife International Illustrated Checklist of the Birds of the World* and the *Illustrated Checklist of the Mammals of the World*, respectively. These checklists are the first-ever checklists to illustrate every species of birds and mammals and are presented in two volumes.

At Lynx Nature Books, our commitment extends beyond publishing, as we actively contribute to the conservation of nature and biodiversity through a diverse range of publications, including reference books, field guides, monographs, and nature art books. We invite you to explore our extensive catalogue and join us in the journey of understanding and protecting our natural world.

## Aves de España

Eduardo de Juana, Juan M. Varela

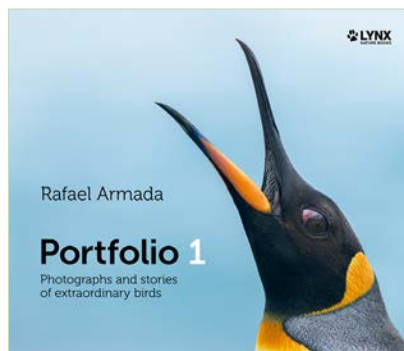

*Text in Spanish*

Fourth edition, revised and updated, of the most popular Field Guide to the identification of the birds of Spain. Recommended by SEO/Birdlife. Contains updated information on all bird species present in Spanish territories.

2024 • 304 pages • 13 x 21 cm • Paperback  
ISBN: 978-84-16728-70-1 • Ref: GUI0070

## Portfolio 1

Photographs and stories of extraordinary birds

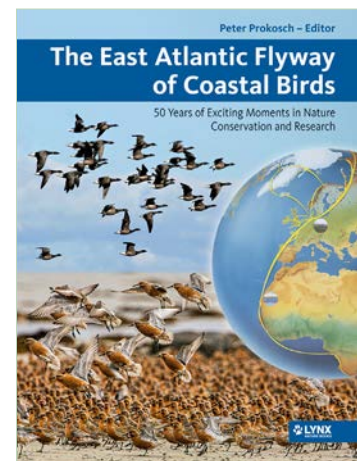

Rafael Armada

Produced by Rafael Armada and shaped over three decades of keen observation and photography of birds, this book offers a glimpse into a seldom-told natural world, a visual journey to some places on Earth you may never have heard of before. Through Armada's lens, you will traverse the farthest reaches of the globe, from the lush Colombian rainforests to the icy landscapes of Antarctica, navigating the subantarctic waters of New Zealand and exploring remote archipelagos in the Atlantic and Pacific.

## The East Atlantic Flyway of Coastal Birds

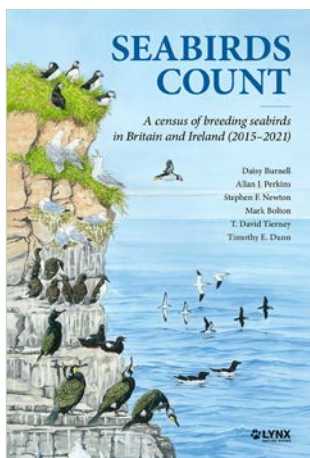

Peter Prokosch (Editor)

The East Atlantic Flyway is a migratory route for millions of shorebirds, covering 16,000 kilometers from Arctic breeding grounds to wintering destinations in Europe and Africa. Accompanying intrepid ornithologists, we explore the secrets of shorebirds' migrations, delving into bird biology, coastal landscapes, and wilderness. Their stories unveil the creation of a "string of pearls" – protected areas along the flyway, a result of collaborative efforts.

## Seabirds Count

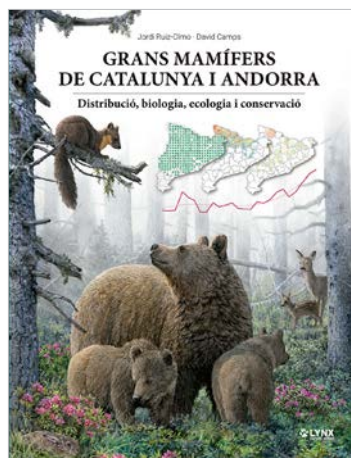

Daisy Burnell, Allan J. Perkins, Stephen F. Newton, Mark Bolton, T. David Tierney, Timothy E. Dunn

Seabirds Count is the fourth census of Britain and Ireland's internationally important populations of breeding seabirds. Over 10,000 sites and 25 species were surveyed between 2015 and 2021, providing a comprehensive update on the state of these populations. These vital data will help aid our understanding of the relationships between seabirds and the pressures they face.

## Birds of the Mesozoic An Illustrated Field Guide

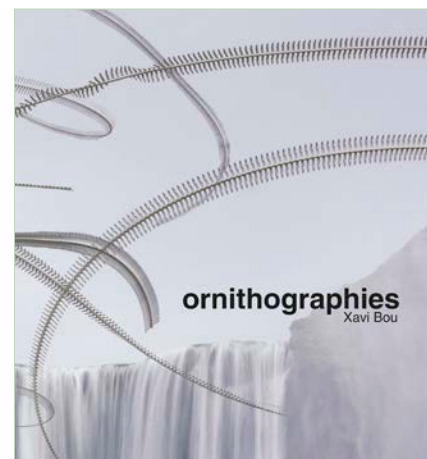

Juan Benito, Roc Olivé Pous

This comprehensive and up to date illustrated field guide, by palaeontologist Juan Benito and palaeo-artist Roc Olivé, aims to illustrate in unprecedented detail the staggering diversity of avialans (modern birds and their closest fossil relatives) that lived from the origin of the group until the Mass Extinction that ended the reign of the non-avian dinosaurs 66 million years ago: the Birds of the Mesozoic.

2022 • 270 pages • 12 x 20 cm • Paperback

## Ornithographies

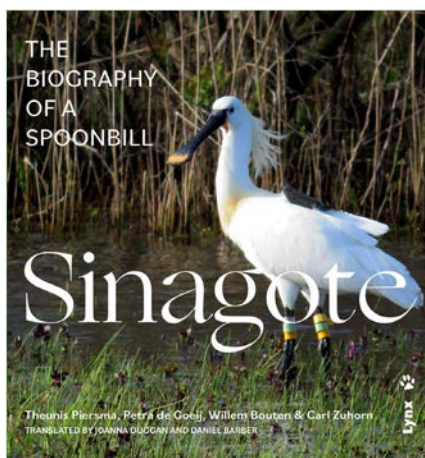

Xavi Bou

"If birds left tracks in the sky, what would they look like?". That was the simple question that planted the seed of this complex work that combines nature, art, and technology. *Ornithographies* arises from an interest in capturing unnoticed moments and questioning the limits of human perception. This innovative project focuses on birds, revealing in a single time frame, the shapes they generate when flying, making visible the invisible.

2022 • 190 pages • 28.5 x 31 cm • Hardback

## Sinagote, the biography of a spoonbill

Theunis Piersma, Petra de Goeij,  
Willem Bouten, Carl Zuhorn

This book tells the story of a female spoonbill called Sinagote born on the island of Vlieland. This story is about more spoonbills than just Sinagote. Part love story, part success story, this book describes the importance of looking beyond our national borders in the protection of migratory birds.

# ornithographies

Xavi Bou

## INNOVATIVE

Presented in a unique format, this work is a balance between art and science; a nature-based dissemination project and a visual poetry exercise, but, above all, an invitation to perceive the world with the same curious eyes of the children we once were.

This book represents a selection of images from the last seven years of Xavi's *Ornithographies* project. The main part showcases 65 horizontal images, each professionally reproduced over a double page spread. And to better reproduce the vertical images, within the same book there is also a section bound to open vertically, with eight vertical double-page images and five unique triptychs. An index provides details on the species and location of each photo, as well as many interesting explanations to help better understand and appreciate the images.

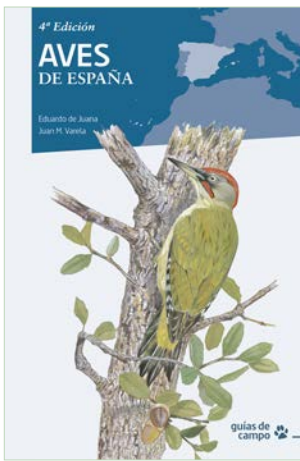

From first glance, it is clear that we are not dealing with classic bird portraits. In fact, every figure merges to shape the image of something else: movement. We could say that the result is a graphical representation of the flight of these animals.

Xavi's special technique takes slow-motion recordings with a digital film camera and overlaps them in post-production to masterfully create an extraordinary image revealing the hidden beauty of bird flight. The effect is dreamlike images, sometimes framed by extraterrestrial landscapes and other times floating in an ethereal space of unreal colours, in which unrecognizable but organic strokes tear the picture like a furious swarm or a lonely brushstroke.

The aesthetic impact of these images is immediate, but if we know what species and what circumstances have generated such a composition, we also gain another layer of understanding of these natural processes that were previously invisible to us.

So, while the premise is that the sky is a canvas and the birds the brushes that paint on it, we must also recognize the role of Xavi Bou as curator, as his task is to search out, observe, and select each type of flight and make visible the particular choreography of each species.

### Seabirds Count

Daisy Burnell, Allan J. Perkins, Stephen F. Newton, Mark Bolton, T. David Tierney, Timothy E. Dunn

Seabirds Count is the fourth census of Britain and Ireland's internationally important populations of breeding seabirds. Over 10,000 sites and 25 species were surveyed between 2015 and 2021, providing a comprehensive update on the state of these populations. These vital data will help aid our understanding of the relationships between seabirds and the pressures they face.

## The East Atlantic Flyway of Coastal Birds

Peter Prokosch (Editor)

The East Atlantic Flyway is a migratory route for millions of shorebirds, covering 16,000 kilometers from Arctic breeding grounds to wintering destinations in Europe and Africa. Accompanying intrepid ornithologists, we explore the secrets of shorebirds' migrations, delving into bird biology, coastal landscapes, and wilderness. Their stories unveil the creation of a "string of pearls" – protected areas along the flyway, a result of collaborative efforts.

# All the Birds of the World

## ONE OF A KIND

*(the feathered kind)*

*The easiest and most enjoyable way to browse through all the birds of the world, in a single volume!*

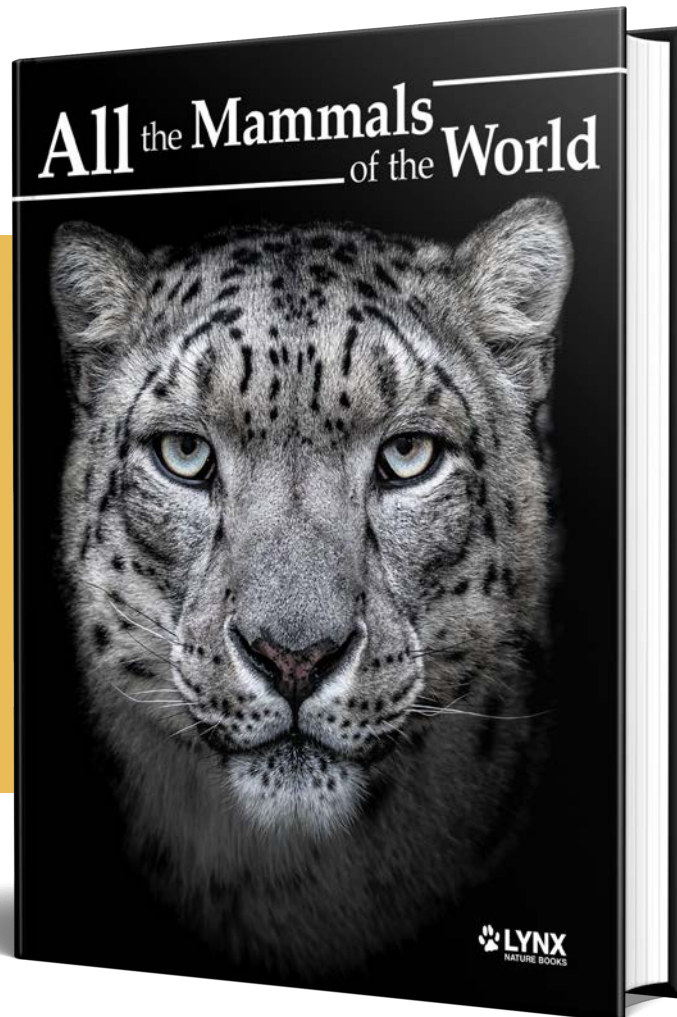

### Highlighted Features:

- Presents every taxon accepted as a species by any of the four major world lists: 11,524 in total.
- 20,865 illustrations covering sexual dimorphism, morphs and many distinctive subspecies.
- 11,558 distribution maps, with notes on altitudinal ranges.
- All 3313 one-country endemic species marked.
- IUCN/BirdLife International conservation status given.
- Taxonomic treatment by the four major world lists indicated and compared for each species.
- Nomenclatural discrepancies explained.
- All English and scientific names from eBird included.
- QR codes for instant access to videos, photos and sound recordings, species-by-species.
- Checkboxes for personal record-keeping.
- All species known to have become extinct since the year 1500 presented separately in their own appendix.
- A 37-page world atlas of colour reference maps, with relevant details of interest to birders and ornithologists.

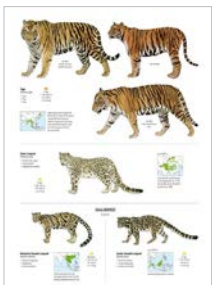

# All the Mammals of the World

## ONE OF A KIND

(the furry kind)

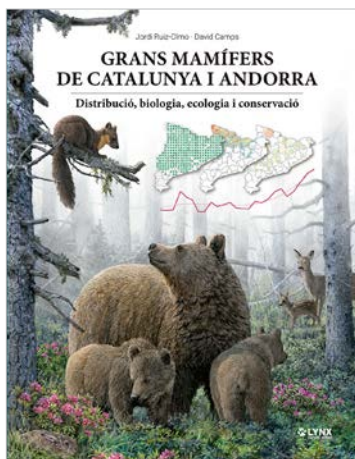

Explore the wealth of details and features packed into this lavishly illustrated book!

### Highlighted Features:

- Presents 6581 species in total, including 6459 extant wild species, 19 domestic species and 103 extinct species.
- 7349 illustrations covering all species as well as sexual dimorphism, morphs and some distinctive subspecies.
- Relevant measurements for length and mass provided when available, as well additional data for groups where important.
- 6459 distribution maps, with written summary and notes on altitudinal ranges.
- All 2834 one-country endemic species clearly marked.
- Scientific names plus English, French, German and Spanish denominations.
- The IUCN Red List category of extinction risk is given for each species to highlight the importance of study and conservation.
- Appendix listing all taxonomic changes from the Illustrated Checklist of the Mammals of the World to the present.
- More than 100 species known to have become extinct since the year 1500 presented separately with texts and distribution maps in their own appendix.
- Summary of recognized domestic species provided in a separate appendix.
- A 37-page world atlas of color reference maps, with relevant details of interest to mammal enthusiasts and professionals.

## HBW and BirdLife International Illustrated Checklist of the Birds of the World – Volume 2

Josep del Hoyo, Nigel J. Collar (Editors)

The first ever Illustrated Checklist of the Birds of the World is really two works in one. It is a complete checklist whose taxonomy incorporates the most up-to-date information and an exhaustive methodology (Tobias et al. 2010) in an entirely systematic and consistent way. At the same time, it contains illustrations and distribution maps for every bird species in the world.

2016 • 1013 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-98-9 • Ref: ILCHK02

## Atlas dels ocells de Catalunya a l'hivern 2006-2009

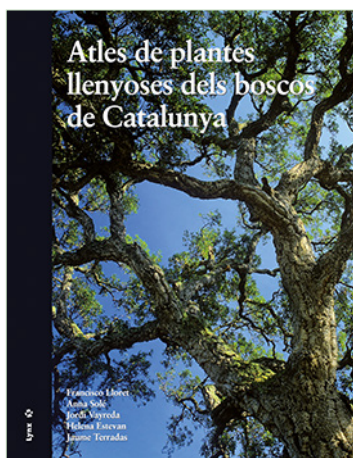

Sergi Herrando, Lluís Brotons, Joan Estrada, Santi Guallar, Marc Anton

*Text in Catalan*

This atlas is one of the most important collective contributions to the knowledge of biodiversity in Catalonia to date. A total of 318 bird species were observed in Catalonia during the study period, of which 206 wintered regularly and relatively abundantly. Includes 570 maps, 519 ghaps, 238 illustrations and 35 photographs.

2011 • 648 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-72-9 • Ref: ALT0009

■ 60 €

# HANDBOOK OF THE BIRDS OF THE WORLD

## ICONIC

The Quality Standard by

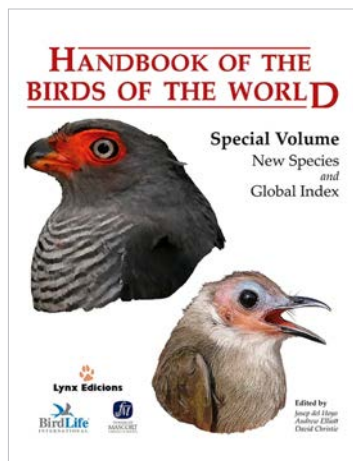

The *Handbook of the Birds of the World (HBW)* is the first work ever to illustrate and deal in detail with all the living species of birds. Acclaimed as the most remarkable publishing project on birds ever conceived and executed, it is also the first work ever to cover an entire Class of the Animal Kingdom. Essential for libraries, universities, ornithologists and birders, HBW is now on its way to becoming a valuable collector's item.

Features:

- 17 volumes
- 1,030 plates
- 20,617 figures
- 7,075 photos
- 10,200 maps
- 13,367 pages
- c. 100,000 references
- 31 x 24 cm, Hardback

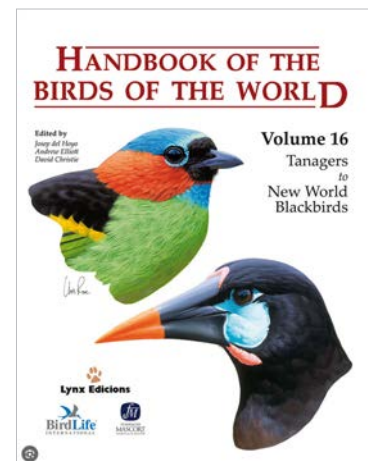

**Handbook of the Birds of the World – Special Volume**  
Tanagers to New World Blackbirds

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Our commitment with the series has been to cover in detail and illustrate every species of bird in the world. This task has taken from 1992, with the publication of Volume 1, to 2011 with the publication of Volume 16. The Special Volume covers and illustrates 69 newly described species, with texts, plates and distribution maps in the classic HBW format.

2013 • 812 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-88-0 • Ref: HBWSPEC

■ 50 €  
»

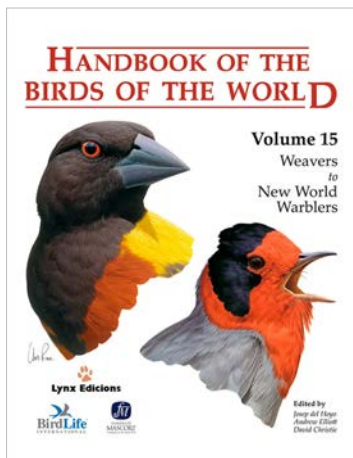

**Handbook of the Birds of the World – Volume 16**  
Tanagers to New World Blackbirds

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

This volume is the culmination of the monumental task of treating with text and illustrations in a single work every living bird species in the world. The volume begins with a Foreword by Anders Pape Møller on birds and climate change. With just a few exceptions, the majority of the species in this volume are from the Nearctic and Neotropical.

2011 • 894 pages • 24 x 31 cm • Hardback

■ 119 €  
»

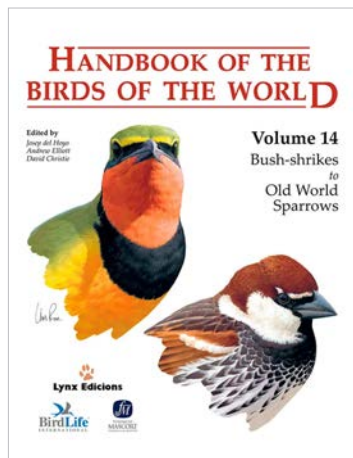

**Handbook of the Birds of the World – Volume 15**  
Weavers to New World Warblers

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Foreword titled "Conservation of the World's Birds: The View from 2010" by Stuart Butchart, Nigel Collar, Alison Stattersfield and Leon Bennun from Birdlife International. This volume includes 8 families and a total of 606 species.

2010 • 879 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-68-2 • Ref: HBW0015

■ 119 €  
»

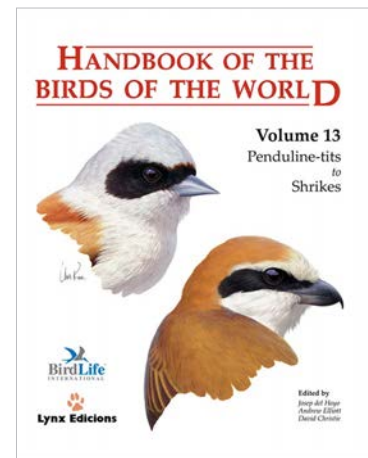

**Handbook of the Birds of the World – Volume 14**  
Bush-shrikes to Old World Sparrows

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Foreword by Stephen Moss, a global vision of the past, present and future of the observation of birds, from the first approaches to the birds by eccentric collectors to what today is a massive, global activity which influences the conservation of birds, the development of citizen science and has an undeniable economic impact. This volume covers 17 families.

2009 • 893 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-50-7 • Ref: HBW0014

■ 119 €  
»

**Handbook of the Birds of the World – Volume 13**  
Penduline-tits to Shrikes

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Foreword by Ian Newton which deals with various aspects of bird migration. The volume treats 16 families. It is a book that will be enjoyed by anyone interested in the birds of the Old World, containing basically species of Europe, Asia, Africa, Australasia and the Pacific Islands, though it also treats a few North American species, such as the enigmatic Verdin.

2008 • 879 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-45-3 • Ref: HBW0013

■ 119 €  
»

**Handbook of the Birds of the World – Volume 12**  
Picathartes to Tits and Chickadees

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

An interesting Foreword by Kevin Caley on fossil birds. It covers 15 families, mostly Asiatic, Australian and African species, but also North American ones.

2007 • 815 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-42-2 • Ref: HBW0012

■ 119 €  
>>

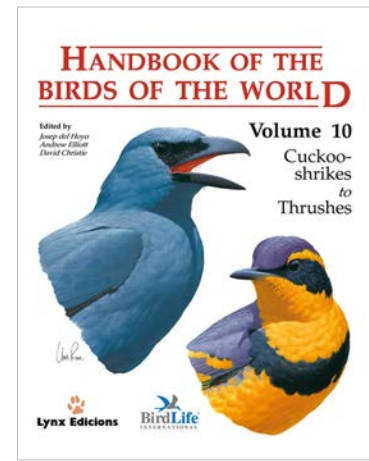

**Handbook of the Birds of the World – Volume 11**  
Old World Flycatchers to Old World Warblers

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

The Foreword by Cagan H. Şekercioğlu deals with the ecological role of bird populations. It covers 8 families. Half of the volume is taken up by the Old World flycatchers and Old World warblers, which with 116 and 145 species respectively, are the most numerous families.

2006 • 798 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-96553-06-4 • Ref: HBW0011

■ 119 €  
>>

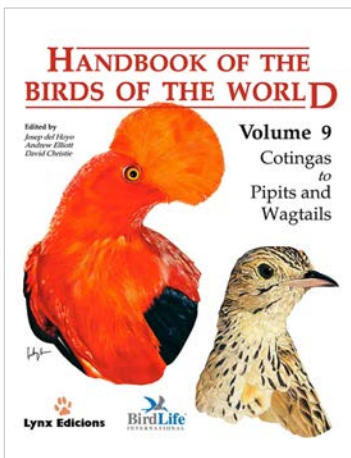

**Handbook of the Birds of the World – Volume 10**  
Cuckoo-shrikes to Thrushes

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Foreword about the ecology and impact of exotic birds. This volume is the largest in the series (895 pages) with 14 families (cuckoo-shrikes, bulbuls, leafbirds, fairy-bluebirds, ioras, Hypocolius, silky-flycatchers, Palmchat, mockingbirds & thrashers, waxwings, dippers, wrens, accentors, thrushes).

2005 • 895 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-87334-72-6 • Ref: HBW0010

■ 119 €  
>>

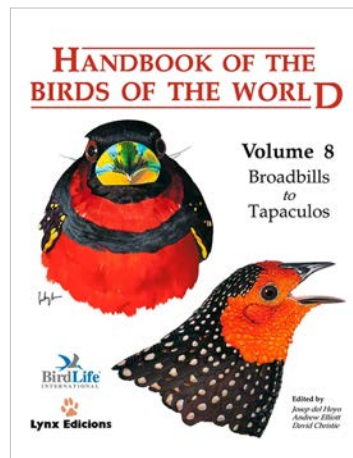

**Handbook of the Birds of the World – Volume 9**  
Cotingas to Pipits and Wagtails

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Foreword by Richard C. Banks, who traces the history and analyses the application of ornithological nomenclature. 9 families (cotingas, manakins, tyrant-flycatchers, larks, swallows, pipits and wagtails, New Zealand wrens, scrub-birds and lyrebirds). Of interest to ornithologists from around the world, as it ranges from localized species like Australia's Noisy Scrub-bird, to others more widely distributed.

2004 • 863 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-87334-69-6 • Ref: HBW0009

■ 119 €  
>>

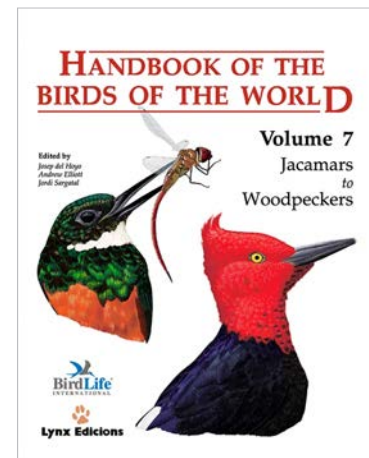

**Handbook of the Birds of the World – Volume 8**  
Broadbills to Tapaculos

Josep del Hoyo, Andrew Elliott, David A. Christie (Editors)

Foreword by Murray Bruce, on the history of bird classification. It covers the first 9 families (broadbills, asities, pittas, ovenbirds, woodcreepers, typical antbirds, ground-antbirds, gnateaters, tapaculos). Especially useful for those interested in tropical birds.

2003 • 845 pages • 24 x 31 cm • Hardback  
ISBN: 978-84-87334-50-4 • Ref: HBW0008

■ 119 €

**Handbook of the Birds of the World – Volume 6**  
 Mousebirds to Hornbills

Josep del Hoyo, Andrew Elliott, Jordi Sargatal (Editors)

This volume's Foreword, by Luis Baptista and Don Kroodsma, is an exhaustive examination of avian bioacoustics. 12 families are covered. From the todies to the motmots, the threatened ground-rollers and the singular cuckoo-rollers, to mousebirds and woodhoopoes, bee-eaters, rollers and hornbills, and the colourful trogons and kingfishers.

2001 • 589 pages • 24 x 31 cm • Hardback  
 ISBN: 978-84-87334-30-6 • Ref: HBW0006

■ 119 €  
 >>

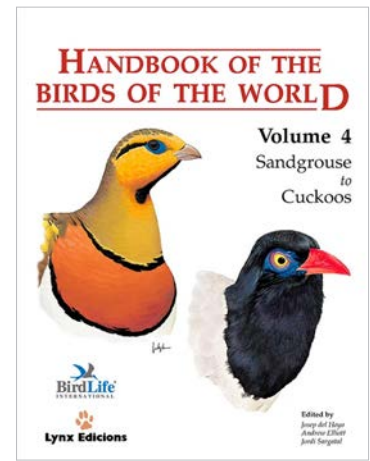

**Handbook of the Birds of the World – Volume 5**  
 Barn-owls to Hummingbirds

Josep del Hoyo, Andrew Elliott, Jordi Sargatal (Editors)

This is the volume to which the greatest number of experts have contributed (38 authors). The Foreword, by Nigel J. Collar deals with risk indicators and status assessment in birds. The 10 families covered will be of special interest to admirers of nocturnal birds, indefatigable swifts and the extraordinary hummingbirds.

1999 • 759 pages • 24 x 31 cm • Hardback  
 ISBN: 978-84-87334-25-2 • Ref: HBW0005

■ 119 €  
 >>

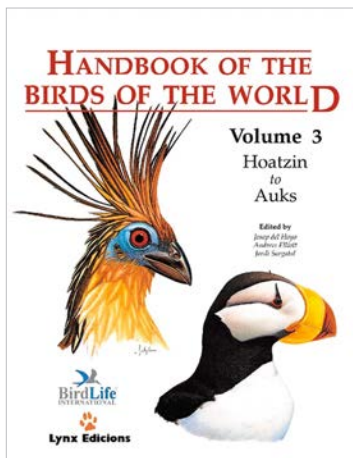

**Handbook of the Birds of the World – Volume 4**  
 Sandgrouse to Cuckoos

Josep del Hoyo, Andrew Elliott, Jordi Sargatal (Editors)

The book begins with a Foreword by Jürgen H. Hafner, titled Species Concepts and Species Limits in Ornithology. The volume describes 6 families, fewer than other volumes, but contains the most species (834 species), as some of the families are very large; pigeons and doves (309 species), parrots (322 species) and cuckoos (136 species).

1997 • 679 pages • 24 x 31 cm • Hardback  
 ISBN: 978-84-87334-22-1 • Ref: HBW0004

■ 119 €  
 >>

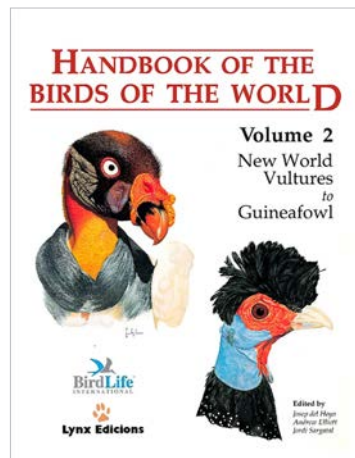

**Handbook of the Birds of the World – Volume 3**  
 Hoatzin to Auks

Josep del Hoyo, Andrew Elliott, Jordi Sargatal (Editors)

34 experts from 13 countries contributed to this volume, which covers 30 families. These include singular families with only one species (Hoatzin, Limpkin, Sunbittern, Crab Plover, Ibisbill, Kagu, Plains-wanderer), but mainly families of waterbirds: rallids, snipes and phalaropes, skuas, plovers, gulls, terns and auks.

1996 • 821 pages • 24 x 31 cm • Hardback  
 ISBN: 978-84-87334-20-7 • Ref: HBW0003

■ 119 €  
 >>

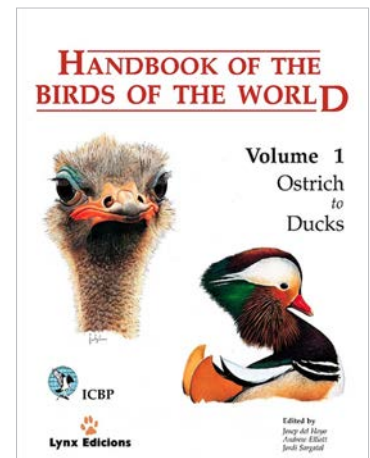

**Handbook of the Birds of the World – Volume 2**  
 New World Vultures to Guineafowl

Josep del Hoyo, Andrew Elliott, Jordi Sargatal (Editors)

This volume, boosted by the spectacular reception given to Volume 1, benefits from the internationalization of the authors (19 experts from 16 countries), and the incorporation of prestigious illustrators who greatly contributed to the improvement and consolidation of the project. The book covers the orders Falconiformes (5 families) and Galliformes (7 families).

1994 • 638 pages • 24 x 31 cm • Hardback  
 ISBN: 978-84-87334-15-3 • Ref: HBW0002

■ 119 €  
 >>

**Handbook of the Birds of the World – Volume 1**  
 Ostrich to Ducks

Josep del Hoyo, Andrew Elliott, Jordi Sargatal (Editors)

This is the emblematic first volume of the series, published in 1992. It features a Foreword by Christoph Imboden, presenting the project. There is also a 38-page introductory article, providing a complete general description of the biology of birds. Following the taxonomical order of the encyclopaedia, the volume covers the 27 bird families.

1992 • 696 pages • 24 x 31 cm • Hardback  
 ISBN: 978-84-87334-10-8 • Ref: HBW0001

# HANDBOOK OF THE MAMMALS OF THE WORLD.

Published by Lynx Edicions in association with  
Conservation International and IUCN

## PRESTIGIOUS

The Quality Standard by

The *Handbook of the Mammals of the World* is an unprecedented reference work for the Class Mammalia. For the first time ever, this collection of nine volumes describes, with a combination of scientific rigour and readability, every species of mammal on Earth. Every currently recognized mammal species is treated, along with an overview of each mammalian family. It provides up-to-date information on the systematic relationships, natural history, ecology, and current conservation status for all mammals.

Published by Lynx Edicions in association with Conservation International and IUCN.

## Handbook of the Mammals of the World – Volume 9

Bats

Don E. Wilson, Russell A. Mittermeier (Editors)

Bats occupy almost every habitat on six continents and their ecology is incredibly diverse. Pollinators and seed dispersers for thousands of species of plants, bats are critical for the maintenance of tropical ecosystems. This volume covers them all.

2019 • 1008 pages • 24 × 31 cm • Hardback

**Ornithographies**

Xavi Bou

"If birds left tracks in the sky, what would they look like?" That was the simple question that planted the seed of this complex work that combines nature, art, and technology. *Ornithographies* arises from an interest in capturing unnoticed moments and questioning the limits of human perception.

This innovative project focuses on birds, revealing in a single time frame the shapes they generate when flying, making visible the invisible. The result, presented in a unique book format, is a balance between art and science; a nature-based dissemination project and a visual poetry exercise, but, above all, an invitation to perceive the world with the same curious eyes of the children we once were.

2022 • 176 pages • 28.5 x 31 cm • Hardback  
ISBN: 978-84-16728-59-6 • Ref: FT00001
